Accessible Information Standard Questionnaire

At Leeds Student Medical Practice we want to make sure that we give you information in a way that is clear to you, and to have on record any communication needs you might have.

The NHS Accessible Information Standard aims to ensure those patients and their carers who have a disability, impairment or sensory loss can receive access and understand information and receive professional communication support if it is required.

If you have selected 'Yes' to having a communication need this questionnaire gives you the opportunity to inform us we will record your preferred way of communicating with the surgery and its staff.
